## Feature Highlights

**Anti-slip dimples**  
Dimples work together with the Ripple crockery to facilitate one-handed dining and stability when traversing from the kitchen to the ward.

**Closed basin concept**  
Closed basins and these dimples also serve to contain spills of sauces or drinks

**Side Recess**  
Makes it easy for the stewarding staff to pick off and put down loaded or unloaded trays

**Unique gripping positions**  
Unique design allows multiple gripping positions to accommodate differently demographic of staff or patients' anthropometry

**Cooling under bumps**  
Multiple bumps on the underside serve as cooling fins to quickly dissipate the heated tray while providing extra hand surface grip

**Geri Chair compatibility**  
Raised footing allows the tray to sit nicely on Geri Chair

**Brand Logo**  
Customise with your logo for brand identity purposes

# Plate

For serving non-soupy main dishes, pasta, rice, noodles and pancakes

### Rounded corners

Steep side walls allows easy one-hand scooping with a fork or spoon

### Enlarged thumb rest

"Ears" that extend on both sides aid the caretaker to carry the plate with one hand while feeding the patient

### Passive venting

Side lip recess on the underside allows excess moisture to escape while making lid easy for user to lift

### Lid as a serving saucer

Used to contain other smaller lids, wrappers, and soiled cutlery during dining sessions

### Nesting (Storage)

Individual plate and plate lids make it easy to nest on each other to save space during storage

### Rippled nesting (pre-plate)

The rippled surface on the lid allows the assembled plate containing food to be placed on top of each other during food preparation

# Casserole

For serving soup based main dishes, cereals, purees and porridge

### 4-direction lid

The design of the Ripple's lid is quad-directional to meet the pre-plating requirements of the industrial kitchen

### Lid as serving saucer

Can be used by the caregiver to catch drools or spills while feeding

### Nesting (storage)

Individual plate and plate lids make it easy to nest on each other to save space during storage

### Rounded corners

To enhance the "yogurt scooping" gesture, internal corners have been designed to better fit the spade of the cutlery spoon

### Passive venting

The side lip recess on the underside allows excess moisture to escape while making the lid easy for users to lift

### Rippled Nesting (pre-plate)

The rippled surface on the lid allows the assembled plate containing food to be placed on top of each other during food preparation

# Cup

For serving hot & cold beverage and soup

### Elliptical straw vent hole

For ergonomic convenience, the lid can be used with a tilted straw while still allowing excess moisture to escape

### Restricted feeding lip

Compatible with coffee lids to prevent spillage and minimize choking risk

### Oversized tilted handle

For various gripping styles adopted by different demographics.

- Geri Grip
- Thumb rest grip

### Rounded corners

Cup can be used for serving soup and puree

### Quick release lid

The lid is designed with maximum engagement for AGV traversing yet easy removal by the user

### Rippled nesting (pre-plate)

The rippled surface on the lid allows other assembled cups with contents to be placed on top of each other during food preparation

# Dishware

For serving rice, dessert, appetiser, egg and side dishes

### 4-direction lid

The design of the ripple lid is quad-directional to meet the pre-plating requirements of the industrial kitchen

### Rounded corners

To enhance "yogurt scooping" gesture, internal corners have been designed to better fit the spade of the cutlery spoon

### Nesting (storage)

Individual dishware and its lids make it easy to nest on each other for space saving during storage

### Kidney shaped design

Kidney shape vessel shaped to better fit for single handed gripping while maintaining maximum volume

### Increased height

The tall dimensions of the vessel make it suitable for soup and ideal for typical nutrition meal supplements (hard boiled egg)

### Rippled Nesting (pre-plate)

The rippled surface on the lid allows the assembled plate containing food to be placed on top of each other during food preparation
